## PROJECTS

---

### Food Delivery Application

- Created YumXpress Food App using JavaSE, JDBC, GUI, and Oracle, with separate modules for Sellers, Customers, and Delivery Staff.
- Designed intuitive frames such as CustomerCartFrame, CancelOrderFrame, and OrderHistoryFrame to enhance user experience and simplify order management.
- Added Review Functionality for user feedback, integrated essential features like FOOD API and EMAIL-sending to boost application utility.

### WeatherWise360 App

- Build a Dynamic Weather Application.
- It uses a bunch of cool technologies like HTML, CSS, and JavaScript for the design, but gets its weather data live from the internet using Java and stuff called Servlets and JSP.
- So basically, you type in your city and it pulls in real-time weather information.

### Portfolio Website

- Developed a professional personal portfolio website using html and css,javascript,reactjs and bootstrap.
- It's totally mobile-friendly and even has a cool dark mode you can switch to.
- It's like a digital resume where I can show off all my projects, skills, and stuff I've learned.
